Shen-Ion HarmoNIK™ Aqua-Vitaliser Maxi I

Shen-Ion HarmoNIK™ Aqua-Vitaliser Maxi II

Assembly Instructions

Thanks for choosing the **Shen Ion HarmoNIK™ Aqua-Vitaliser** water vitalisation system.

Attach the **Shen-Ion HarmoNIK™ Aqua-Vitaliser** directly parallel to the water pipe. It is important to create as much metal contact as possible.

Existing pipe insulation has to be removed before installation and has to be properly replaced afterwards.

The **Shen-Ion HarmoNIK™ Aqua-Vitaliser** should only be attached downstream of existing UV, decalcification or other water treatment systems. The full effect of the water vitalization system will only be achieved after a few days.

During installation, ensure that both metal lids of the **Shen-Ion HarmoNIK™ Aqua-Vitaliser** point in the direction of the water flow.

Attach the **Shen-Ion HarmoNIK™ Aqua-Vitaliser** carefully to the water pipe with the two included installation belts.

For pipes with smaller diameters it may be necessary to secure the **Shen-Ion HarmoNIK™ Aqua-Vitaliser** with an additional pipe clamp to prevent it from dislodging.

We wish you great pleasure from your vitalized water.
